

### ABSTRACT OF THE DISCLOSURE

A bending token for providing conditional access to data stored therein is disclosed. The token comprises a first member, for insertion into a USB-compliant host computer female connector along a first longitudinal axis, USB-compliant host computer female  
5 connector having a plurality of host conductive surfaces; a second member, disposed along a second longitudinal axis, the second member having a processor providing conditional access to data stored in a memory; a flexible conductor, electrically coupling the processor and the plurality of host conductive surfaces when the first member is inserted into the USB-compliant host computer female connector; and a bendable member, coupled to the  
10 first member and the second member, the bendable member permitting the second longitudinal axis rotated away from the first longitudinal axis.
